    - (Override recommended for service)
  - Gear operated not recommended

- **Titan Screen**
  - Motorized with remote control standard
  - Straight and override motors available
  - Gear operated option (hand crank) also available
Introducing the Nautilus Shutter/Screen Combination

The Nautilus Shutter/Screen Combination was developed to fill the need for those who wanted both the benefits of the highest quality hurricane shutter available and the advantages of insect or solar screen protection.

The Nautilus Rolling Shutter System has been the standard of the shutter industry since it was patented in 2009 so it was only natural to couple it with the Titan Screen System, the standard in the screen industry. By combining these products we have produced the only true combination system utilizing both systems in one compact hood. No other system offers the compact size and the ease of operation you will experience with the Nautilus/Titan Combination System.

Whether you have an infinity pool and want to preserve your view without a pool cage, or just want the dual advantages of hurricane and insect protection for your family, the Nautilus Shutter/Screen Combination is the answer.
